

Jannael Orlando Hernández Macedo | Software Developer

Software developer, professional and open-source enthusiast.

Estado de México, México | orlandojannael@gmail.com | +52 56 3368 3040

LinkedIn: <https://www.linkedin.com/in/jannael-orlando-44604a349> **Github:** <https://github.com/jannael>

CORE SKILLS

Typescript | Javascript | Node.js | React | Git | HTML | CSS | Bun | Tailwind CSS

PROFESSIONAL EXPERIENCE

Dual Education Student | Universidad Tecnológica Fidel Velázquez 08/23 - 08/24

Developed automation and hardware/software integration projects, culminating in a smart greenhouse controlled by computer vision. Used tools like Python, OpenCV, Raspberry Pi, and Arduino to create real-time monitoring and control systems, also achieving first place in the international RetoPY competition as team leader.

- **Smart greenhouse with computer vision:** Plant monitoring system using Python and OpenCV on Raspberry Pi, controlling temperature and humidity via serial communication with Arduino.

PROJECTS

Devsync

Tool to sync GitHub, LinkedIn, CV (Harvard format), portfolio, and academic history. Allows you to keep your entire professional presence automatically updated through a single configuration file.

- **PDF generation with Puppeteer:** Renders the CV as HTML and exports it to PDF per language.
- **Native internationalization:** Each section supports multiple languages; the build generates separate artifacts (CV, LinkedIn) for each configured lang.

Glintier

Tool to enhance the development experience using git. Glintier acts as a transparent proxy for git commands, intercepting execution and providing enhancements like interactive staging, branch switching with a selector, reliable repository status parsing, among other features designed to optimize the development workflow without sacrificing git's native UX.

- **Porcelain parsing:** Parses git status --porcelain -z with NUL splitting for 100% reliable file detection.

- **Cross-platform aliases:** The setup command configures aliases on Unix and Windows automatically.
