

Jannael Orlando Hernández Macedo | Software Developer

Software developer, professional and open-source enthusiast.

Estado de México, México | orlandojannael@gmail.com | +52 56 3368 3040

LinkedIn: <https://www.linkedin.com/in/jannael-orlando-44604a349> **Github:** <https://github.com/jannael>

CORE SKILLS

Typescript | Javascript | Node.js | React | Git | HTML | CSS | Bun | Tailwind CSS

PROFESSIONAL EXPERIENCE

Dual Education Student | Universidad Tecnológica Fidel Velázquez

08/23 - 08/24

Developed automation and hardware/software integration projects, culminating in a smart greenhouse controlled by computer vision.

- **Smart greenhouse with computer vision:** Plant monitoring system using Python and OpenCV on Raspberry Pi, controlling temperature and humidity via serial communication with Arduino.
- **Real-time control interface:** Built a GUI with Tkinter to operate greenhouse sensors and actuators.
- **International RetoPY competition:** First place as team leader.

PROJECTS

Devsync

Tool to sync GitHub, LinkedIn, CV (Harvard format), portfolio, and academic history.

- **Hexagonal architecture:**
- **PDF generation with Puppeteer:** Renders the CV as HTML and exports it to PDF per language.
- **Native internationalization:** Each section supports multiple languages; the build generates separate artifacts (CV, LinkedIn) for each configured lang.
- **GitHub Actions:** Detects changes in DEVSYNC.json and automatically regenerates and commits all artifacts.
- **Template system:**
- **Supply chain security:**

GitHub: <https://github.com/jannael/devsync>

Demo: <https://devsync.work>

Glintier

Tool to enhance the development experience using git.

- **Transparent proxy:** Uses Bun.spawn with stdio: 'inherit' to connect Git streams directly to the terminal, preserving colors, interactive prompts, and the entire native UX.
- **Hexagonal architecture:**

- **Interactive staging:** g add with no arguments opens a multiselect with @clack/prompts showing only modified files, automatically filtering .env and node_modules.
- **Porcelain parsing:** Parses git status --porcelain -z with NUL splitting for 100% reliable file detection.
- **Interactive switch:** g switch lists local and remote branches in a navigable selector.
- **Cross-platform aliases:** The setup command configures aliases on Unix and Windows automatically.

EDUCATION

Mechatronics Technician | CECYTEM

08/21 - 07/24

- **International Python competition:** Won a competition as leader of a two-person team solving Python challenges.
- **National GPA:** Recognized as the highest national GPA in my program.

CERTIFICATIONS

AWS Cloud Practitioner Essentials Santander

Credential

<https://github.com/jannael/jannael/raw/main/academics/Constancia%20AWS%20Cloud%20Practitioner%20Essentials.pdf>

- **AWS essentials:** Manage AWS services such as IAM, S3, EC2, RDS, CloudFront, Lambda, etc.
- **CloudFront:** Use CloudFront to distribute static content worldwide for instant loading.
- **Billing:** Use AWS Billing to manage and monitor resource costs.

Claude Code in Action

Credential <https://github.com/jannael/jannael/raw/main/academics/Claude%20code%20in%20action.pdf>

- **Agentic coding:** Use Claude Code to delegate complex development tasks, from implementation to refactoring, with full project context.
- **Prompt engineering:** Structure effective instructions to get precise and consistent results in automated development workflows.
- **AI workflows:** Integrate Claude Code into the real development cycle, combining code review, generation, and assisted debugging.

Academia STEM Participation Certificate - RetoPY

Credential

<https://github.com/jannael/jannael/raw/main/academics/Constacia%20de%20Participacion%20Academia%20STEM.pdf>

- **RetoPY:** International programming competition organized by Academia STEM, where I won first place.

React Junior Developer - Certificates.dev

Credential <https://github.com/jannael/jannael/raw/main/academics/React%20Junior%20Developer.pdf>

- **React essentials:** Master JSX, component composition, props, children, and the fundamental rules of React's component model.
- **Hooks and state:** Manage state with useState, understand the render cycle, state snapshots, and when to use useRef to avoid unnecessary re-renders.

- **Forms and events:** Handle interactions with React's event system, implement controlled and uncontrolled forms.
